

## *Incomparable features and performance to clean the most challenging conditions.*

The Rhino RD160 is built robust with design features for long hours of fatigue free sweeping in harsh and demanding applications.

### Durable for tough environment

With a rugged chassis, heavy duty bumper and all around powder coated steel body the Rhino 160 is made to last for long years in tough environments.

### Design

High seating position gives the operator the best visibility of the area to be swept. Curved rear bumper makes it easy to negotiate tight corners and take short turns without collisions.

### Maximum Filtration - Reduces airborne dust

Reduces airborne dust: Two large filters with elastomer frames and an innovative spider bracket with multi-point filter agitation system ensures very high levels of dust filtration.

### Power Train

Tested and proven Kubota engine with world-wide service and spare parts support.

### Operator friendly - Greater Productivity

The RD 160 is tough on dust but soft on operators. Ergonomic design of seat, steering and all controls ensures fatigue free operation for long hours.

Side broom integrated with the arm - enables riding on bumps and speed breakers easy without any damages.

### Hopper with Debris Compact System (DCS)

The hopper of RD160 can be rolled at multi-levels to fill the hopper to the maximum level possible thus utilizing most of the hopper volume.

- 1** Comfortable, aesthetic and ergonomic driver seat. All controls within easy reach of the operator.
- 2** Instrument cluster with easy complete visibility to operator.
- 3** Main broom and side broom adjustment can be done on the go from driver's seat.
- 4** Spider bracket for multi-point filter cleaning ensures maximum filter cleaning helps in uninterrupted sweeping even in heavy dust environments.
- 5** Turn indicators and fuel cap with lock available as standard.
- 6** Main broom removal and replacement needs no tools.

- 7** Adjustable driver seat with foldable arm for maximum operator comfort.
- 8** Removal of filters in hopper easy with toggle clamps.
- 9** V-Shaped broom for effective sweeping. Dense bristle bunch for achieving optimum results.
- 10** Temperature cum level indicator for hydraulic tank easily visible for monitoring.
- 11** Gas filled shock absorbers for engine hood and hopper hood.
- 12** Hand brake for safety whilst parking.
